

# Call for papers

A special theme issue of Drying Technology, published monthly by Taylor & Francis (USA) will be devoted to the scientific, engineering and technological developments in the area of nonconventional drying techniques, both thermal and nonthermal.

Papers are invited on basic as well as applied original contributions that aim at enhancing efficiency, quality of products, environmental and safety aspects of innovative drying concepts and technologies. Authors from academia as well as industry may contact one of the Guest Editors named below with a short abstract.

The deadline for initial submission of full papers in journal format is **August 31, 2007**. The peer review and revision processes may require up to three months. We anticipate publication in April 2008.

Please contact for details or abstract submission

Zhaonghua Wu or A. S. Mujumdar
